

## CLAIMS

1. A resin composition comprising 100 parts by weight of an ethylene/1-butene random copolymer (a), 10 to 500 parts by weight of at least one styrene block copolymer (b), 10 to 5 140 parts by weight of an oil (c) relative to 100 parts by weight of the total amount of (a) and (b), and 0 to 500 parts by weight of a polypropylene resin (d) relative to 100 parts by weight of the total amount of (a) and (b).
- 10 2. The resin composition according to claim 1, wherein the ethylene/1-butene random copolymer (a) has a density (measured according to ASTM D-792) of 0.857 to 0.890 g/cm<sup>3</sup>, an MFR (measured according to ASTM D-1238) of 0.1 to 10 g/10 min, and a molecular weight distribution of 1.5 to 3.0 as measured by GPC, and the at least one styrene block copolymer (b) is selected from the group consisting of copolymers of styrene/butadiene/styrene, styrene/isoprene/styrene, styrene/ethylene-butene/styrene and styrene/ethylene-propylene/styrene.
- 20 3. A molded body comprising the resin composition according to claim 1 or 2.
- 25 4. An injection molded body comprising the resin composition according to claim 1 or 2.

5. An extrusion molded body comprising the resin composition according to claim 1 or 2.

5 6. A sheet or film comprising the resin composition according to claim 1 or 2.

7. A fabric or non-woven fabric comprising the resin composition according to claim 1 or 2.

10

8. A molded body for automobiles, comprising the resin composition according to claim 1 or 2.

9. A molded body for domestic appliances, comprising the  
15 resin composition according to claim 1 or 2.
